

HORSEWRAP®

WHEN ONLY THE BEST IS GOOD ENOUGH

HorseWrap[®] – *When only the best is good enough!*

In recent years, silage and haylage have become more popular as forage in horse business. Especially horses with respiratory problems profit from this dustfree alternative to hay, but also those that have high nutrient requirements. Particularly breeding and sport horses benefit from a high quality haylage, being a tasty and nutritious fodder.

- **Healthy for the horse**

Ensiling maintains important nutrients and hence makes them, compared with grass, available for the horses all year around. Silage is also more hygienic than hay as hay feeding often tends to be dusty.

Dust can cause respiratory problems both for the person who does the feeding and the horse.

The demands for high quality haylage are therefore constantly increasing. With 50-65 % the DM (dry matter) for horse fodder should be higher than e.g. for cattle.

To secure the quality of this feed from stalkier plant material, the silage film needs to be extra resistant.

Therefore our HorseWrap has a higher puncture and tear strength than usual silage films.

In addition haylage for horses is often traded over large distances due to that the horse owners often do not have own farms, which means that the bale is put through more handling and the risk of damage to puncture the bales increases. To lower the risk of quality loss by this extra handling, HorseWrap is developed to give extra protection for puncture and wear resistance.

- **Developed in cooperation with SLU**

HorseWrap was developed and tested in cooperation with experts from SLU (the Swedish University of Agricultural Sciences) and horse owners around Scandinavia. A lot of research by SLU and practical experiences show that silage is an excellent forage for horses.

- **Forageforhorses.com**

Together with Sara Muhonen on Equi-Nutrition we run the website forageforhorses.com to provide advice and information based on current knowledge and research. Sara Muhonen received her postgraduate education at the Department of Animal Nutrition and Management and her Master of Science degree in agriculture (animal science) at SLU.

PRODUCT DATA

Dimensions

250 mm x 0.025 mm x 1800 m

300 mm x 0.025 mm x 1800 m

360 mm x 0.025 mm x 1500 m

365 mm x 0.035 mm x 1000 m

500 mm x 0,025 mm x 1800 m

750 mm x 0.025 mm x 1500 m

Colours

White

Eco Green

Special Edition: 500 mm available in pink

Packaging

250 mm – 48 reels/pallet

300 mm – 36 reels/pallet*

360 mm – 30 reels/pallet

365 mm – 30 reels/pallet

500 mm - 24 reels/pallet

750 mm – 15 reels/pallet*

** 750 mm also available with our Contractorwrap® packaging solution (no box).*

300mm only with our Contractorwrap® packaging solution (no box).

All products with water protected paper core except 750 mm with Contractorwrap packaging solution (no box) with plastic core.

Based on this knowledge we gathered from our cooperations, we have developed our premium HorseWrap film to fit the special needs of haylage production.

- Optimized for mature grass and tough conditions
- SLU tested with high silage quality and low losses
- Special developed recipe with high puncture resistance and tear strength
- For all wrappers and both round & square bales in all sizes

Important:

Handle film reels with care to avoid damage, particularly to reel edges, which will result in breaking of the film when wrapping. Store the film in dark cool conditions.

Charity Edition

Horsewrap 500 mm is also available in pink color for support of breast cancer awareness!

Trioplast – We keep our promises!

Reliable

Proven | Trustworthy | Efficient | Safe | High Quality
Authentic | Economic | Dependable | Supply Capability

Long-term

Solid | Durable | Experienced Team | Long-term Partnerships | Confident | Fair | Care for the Environment

Active

Constant dialogue with Customers & Partners | Leading Innovator | Continuous Process Development | Silage Service & Support

Trioplast is an industrial group with a little over 1,000 employees and a turnover of EUR 430 million. The Group is one of Europe's leading players in innovative and cost-efficient packaging solutions based on polyethylene film. The company's registered office is in Smålandsstenar in Sweden. It operates production facilities in Sweden, Denmark and France and sells its products to a global market. The principal owner of Trioplast is Altor Funds.

WE DESIGN FOR THE FUTURE

As a leading producer of polyethylene film, at Trioplast we take responsibility for the environment in everything we do. We strive to reduce the amount of material in our products, we recycle and reuse waste materials, and we continuously develop our expertise so as to decrease our use of non-renewable raw materials.

In short: We design sustainable solutions for the future.
